

3,000 Scientific Studies Show Red and Near-infrared Light can Help You:

Research

Near-infrared (NIR) and red-light therapy devices have been FDA-approved for several purposes including anti-aging, hair-loss reversal, acne treatment, pain relief, slow to heal wounds, fat loss, among other purposes.

This is worth noting because this validates an abundance of research showing benefits – this has proven this therapy to be safe and effective in numerous trials in order to gain FDA approval.

- *Look Years Younger Through Powerful Skin Anti-Aging Effects*
- *Heal and Recover Faster Than You Ever Thought Possible*
- *Lose Fat Faster Than Diet and Exercise Alone*
- *Eliminate Pain and Chronic Inflammation*
- *Boost Your Thyroid and Metabolism*
- *Increase Lean Muscle Mass*
- *Increase Your Energy*
- *Optimize Your Brain*
- *Reduce Cellulite*

Background

Red and near-infrared light are part of the electromagnetic spectrum, and more specifically, part of the spectrum of light emitted by the sun.

These wavelengths of light are “bioactive” in humans.

That means that these types of light literally affect the function of our body at the cellular level, helping cells heal and produce more energy.

Just as human cells need nutrients from food, **LIGHT** is also a necessary nutrient for our cells to function well. Certain wavelengths of light can help energize our cells, affect hormones and neurotransmitters, balance our mood, enhance physical performance, hasten recovery from stress, increase alertness, improve sleep, and positively affect the expression of our genes.

Importance of Light

Most importantly, you need to grasp that the human body NEEDS light to be healthy.

In fact, most Americans are deficient in the benefits of all the wavelengths of light, and there are health consequences when we don't get enough.

They include vitamin D deficiency (from too little UV light) and circadian rhythm disruption (from too little blue light in the morning, and too much artificial light at night). These two issues caused by inadequate and improper light exposure are linked with dozens of types of cancer, as well as heart disease, obesity, diabetes, neurodegenerative disease, and multiple other conditions.

Just as the modern world of processed food leads to chronic malnutrition, our modern light environment (of too much of the wrong kinds of light and too little of the right kinds, and with poor timing) is called mal-illumination. The vast-majority of people living in the modern world are suffering from chronic mal-illumination and don't even realize it. And it has widespread effects on our brain and organ function, immune system, energy levels, mood, neurotransmitter balance, and hormone levels.

A typical RED-RED-360 session takes 20 minutes, and the number of sessions can range from 8 to 15 sessions, depending on your needs and goals.

Introducing RED-RED-360

This is a third-generation technology designed with a proven and effective 635 nm wavelength configuration and adds an 880 nm wavelength for enhanced effectiveness.

It uses all new LED microchips to deliver two specific wavelengths of light for slimming, collagen stimulation, and pain and healing. The unique wavelengths stimulate fat cells to release their contents for a totally non-invasive alternative to liposuction, as well as stimulating collagen and elastin formation for anti-aging. Our advanced red-light therapy has also been shown to greatly enhance the body's ability to heal itself, while reducing pain.

Slimming

RED-RED-360 uses advanced micro-chip technology to naturally slim, shape, and tone areas including the waist, hips, thighs, and upper arms with 6 pads that literally blanket the body offering more coverage than any other in the marketplace. The unique wavelengths of **RED-RED-360** stimulate fat cells to release their contents which is then easily and naturally eliminated by the body. It provides higher absorption rate than Laser treatment therapies. This therapy is also NOT prone to dysmorphic lipid deposition, where the fat removed returns and is deposited at other areas of the body, giving a misshaped appearance and is very simple to operate with less effort than other body sculpting modalities.

Anti-aging Facial

The **RED-RED-360** system includes a face mask to deliver the dual wavelengths of light stimulating the production of elastin and collagen. The effect of more production of collagen and elastin will tighten and generate younger looking vibrant skin. It improves circulation of blood through the capillaries, which enhances wound healing and aids in reduction of scar tissue. Red Light therapy is quickly becoming the safest and most unproblematic way to attain younger looking skin, not only for the face, but for the whole body as well.

Pain and Healing

RED-RED-360 has been shown to greatly enhance the body's ability to heat itself while reducing pain. It is safe and painless, and results are often rapid with no side effects. The results include diminished pain, reduces inflammation, decreased edema, faster healing times, and increased strength of repaired tissues. Our unit helps a wide range of conditions including: Bursitis, Contusions, Skin Disorders, Diabetic Neuropathy, Sports Injuries, Sprains and Strains, Wound Healing and more.

Energy Levels

The LED light is near-infrared in nature and increases heating and energy levels of the cells inside the body. The RED-RED-360 technology is the outcome of path-breaking research on cold light, led by NASA, and is further supported by extensive domestic and international research.

The RED-RED-360 is a high quality third-generation system, that can effectively eliminate FAT fast, in a comfortable and safe manner.
